3 System Test Plan

3.1 Unit Testing

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
OrderTest					
1	testAddItem	The objective of the test is to test if the Customer or Cashier is able to add a Menu item to the order.	Expected: Item of type MenuItem is added to Order. Result: As expected.	OrderItem MenuItem	High
2	testRemoveItem	The objective of the test is to test if the item is removed from the order when Customer decides to remove the item	Expected: Item is removed from the order. Result: As expected	OrderItem MenuItem	High
3	testGetPrice	The objective of the test is to test if the total price of the ordered items is computed.	Expected: Sum of all OrderItems is returned. Result: As expected.	OrderItem	High
4	testCancelOrder	The objective of the test is to test if the entire order is cancelled when the Customer decides so.	Expected: The order is cancelled. Result: As expected.	OrderItem	High

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
MenuItemTest					
1	testParsing	The objective of the test is to test whether menu file is parsed or not	Expected: MenuItem local variables will be initialized Result: As expected	MenuItem	High

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
MenuItemModificationTest					
1	testAddNewItem	The objective of the test is to test if new item is added to menu	Expected: New item will be added to menu.txt. Result: As expected.	Menu MenuItem	High
2	testModifyItem	The objective of the test is to test if we can modify item or set special to menuItem	Expected: Changes will be made according to data modified Result: As expected	Menu MenuItem	High
3	testDeleteItem	The objective of the test is to test if we can delete selected item	Expected: Changes will be made according to data deleted. Item's description will be deleted from menu.txt Result: As expected	Menu MenuItem	High
4	testModifyPizza	The objective of the test is to test if we can modify pizza item details or set special to anytype of pizza	Expected: Changes will be made according to data modified Result: As expected	Menu MenuItem	High

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
MenuTest					
1	testFileExist	The objective of the test is to test if file exist in source folder & whether parsing is working	Expected: Toppings & MenuItem variable will be initialized. Result: As expected.	MenuItem	High
2	testParsingError	The objective of the test is to test what will happen if file does not match parsing criteria	Expected: Parsing error will be thrown Result: As expected	MenuItem	High
Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
PaymentTest					
1	getAmountTest	The objective of the test is to test if the Customer or Cashier is able to get the right amount during payment.	Expected: If the amount is \$10.0 , function must return \$10.0 Result: As expected.	Payment	High
2	processCouponTest	The objective of the test is to test if the coupon provided is authentic or not.	Expected: If given coupon code exists in the coupon.txt calculate discount and return true. Result: As expected	Payment Coupon.txt	High
3	discountedPriceTest	The objective of the test is to test if the discount has been deducted from total price and returned.	Expected: Discount mentioned in coupon.txt is subtracted from the actual price. Result: As expected.	Payment Coupon.txt	High

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
PaymentByCashTest					
1	getAmountTest	The objective of the test is to test if the Customer or Cashier is able to get the right amount during payment.	Expected: If the amount is \$10.0 , function must return \$10.0 Result: As expected.	Payment	High
2	processCouponTest	The objective of the test is to test if the coupon provided is authentic or not.	Expected: If given coupon code exists in the coupon.txt calculate discount and return true. Result: As expected	Payment Coupon.txt	High
3	discountedPriceTest	The objective of the test is to test if the discount has been deducted from total price and returned.	Expected: Discount mentioned in coupon.txt is subtracted from the actual price. Result: As expected.	Payment Coupon.txt	High

Ref	Function	Test Objective	Evaluation Criteria	X-Ref	P
PaymentByCardTest					
1	authenticateCardTest	The objective of the test is to test if the Customer or Cashier is able authenticate card correctly	Expected: If all fields are properly filled Done button appears. CardNo is 16 digits and CVV is 3 digits. Result: As expected.	PaymentByCard	High
2	getCardNoTest	The objective of the test is to test if last 4 digits of cardno are returned or not.	Expected: If card is authenticated then result is last 4 digits. Result: As expected	PaymentByCard	High

3.2System Test

Test Case ID	TCPOS01
Title	Test for Creating Order in Store
Module Tested	Create Order
Importance	This is the basic step in Pizza Ordering System .This is the most important aspect of the system.
Instructions	<ol style="list-style-type: none"> 1.Run the PizzaOrder.java class. 2.Click on Cashier button. 3.Login using username and password. 4.Enter the customer's phone number and click ok. 5.Click Place/Modify Order button. 6.In the menu click on a pizza of choice and click on Add button. 7.For adding toppings select the Pizza in the Order list and click Add Topping. 8.Select a topping , select option of whole/right/left and click on Add button. 9.Click on Ok. 10.Click on Finish.
Expected Result	<ol style="list-style-type: none"> 1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and customer details dialog box will come up. 4.Enter customer phone number and in case it's a new number the system asks for name. 5.Displays menu along with pizzas and special for the day. 6.The selected item will be displayed in the order. 7.New window with list of toppings comes up along with price. 8.Selected topping will be displayed along with price. 9.Return back to main menu. 10.New dialog box with Payment total,option for coupon and payment methods comes up.
Cleanup	Click on the X button at the top right of the window.

Test Case ID	TCPOS02
Title	Test for Creating Order in Kiosk
Module Tested	Create and Modify Order
Importance	This is the basic step in Pizza Ordering System .This is the most important aspect of the system.
Instructions	<ol style="list-style-type: none"> 1.Run the PizzaOrder.java class. 2.Click on Customer button. 3.Enter customer's phone number and click ok. 5.Click Place/Modify Order button. 6.In the menu click on a pizza of choice and click on Add button. 7.For adding toppings select the Pizza in the Order list and click Add Topping. 8.Select a topping , select option of whole/right/left and click on Add button. 9.Click on Ok. 10.Select another item from list and click Add button. 11.Select that item in the order and click on Remove button. 12.Click on Finish.
Expected Result	<ol style="list-style-type: none"> 1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and customer details dialog box will come up. 4.Enter customer phone number and in case it's a new number the system asks for name. 5.Displays menu along with pizzas and special for the day. 6.The selected item will be displayed in the order. 7.New window with list of toppings comes up along with price. 8.Selected topping will be displayed along with price. 9.Return back to main menu. 10.The item appears in the order. 11.Item is removed from order. 12.New dialog box with Payment total,option for coupon and payment methods comes up.
Cleanup	Click on the X button at the top right of the window.

Test Case ID	TCPOS03
Title	Test for Viewing and Modifying Menu by Manager
Module Tested	Modifying Menu
Importance	This is basic function of Manager .Hence it is important
Instructions	<ol style="list-style-type: none"> 1.Run the PizzaOrder.java class. 2.Click on Manager button. 3.Login using username and password. 4.Click on “Add New Item” button. 5.Enter item name,item price select either topping/others,prep time, cook time oven space and check “special” if the item is a special and click Ok. 6.Repeat steps 4 and 5. 7.Select a created item and click on Modify Item button. 8.Make necessary changes and click OK. 9.Select the item and click on Delete Item. 10.Click on Ok.
Expected Result	<ol style="list-style-type: none"> 1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and menu from menu.txt will be loaded. 4.New dialog box with options will come up. 5.Displays menu with new item included. 6.Displays menu with new item included. 7. New dialog box with options will come up 8.Modification is reflected in the menu. 9.Confirmation popup will appear. 10.Item is deleted from menu.
Note	The manager has created initial menu in menu.txt file.
Cleanup	Click on the X button at the top right of the window and click on exit in main window.

Test Case ID	TCPOS04
Title	Test for Paying using Card in Kiosk
Module Tested	Payment by Card
Importance	This is the an important test as payment is one of the primary functions .
Instructions	<ol style="list-style-type: none"> 1.Run the PizzaOrder.java class. 2.Click on Customer button. 3.Enter customer's phone number and click ok. 5.Click Place/Modify Order button. 6.In the menu click on a pizza of choice and click on Add button. 7.For adding toppings select the Pizza in the Order list and click Add Topping. 8.Select a topping , select option of whole/right/left and click on Add button. 9.Click on Ok. 10.Click on Finish button. 11.Enter coupon code as ABCD1234 and click apply. 12.Click on By Card button. 13.Enter Card No.,CVV as numbers and expiry in the format shown in the text field and name and click on Authenticate button. 14.Click on Done.
Expected Result	<ol style="list-style-type: none"> 1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and customer details dialog box will come up. 4.Enter customer phone number and in case it's a new number the system asks for name. 5.Displays menu along with pizzas and special for the day. 6.The selected item will be displayed in the order. 7.New window with list of toppings comes up along with price. 8.Selected topping will be displayed along with price. 9.Return back to main menu. 10.New dialog box with payment options appears. 11.If coupon code is authenticated then discounted price will be shown. 12.New dialog box requesting Card details comes up. 13.A "Done" button appears if authentication is true. 14.Displays a Summary
Cleanup	Click on the X button at the top right of the window.

Test Case ID	TCPOS05
Title	Test for Paying using Cash
Module Tested	Payment by Cash
Importance	This is the an important test as payment is one of the primary functions .
Instructions	<ol style="list-style-type: none"> 1.Run the PizzaOrder.java class. 2.Click on Customer button. 3.Enter customer's phone number and click ok. 5.Click Place/Modify Order button. 6.In the menu click on a pizza of choice and click on Add button. 7.For adding toppings select the Pizza in the Order list and click Add Topping. 8.Select a topping , select option of whole/right/left and click on Add button. 9.Click on Ok. 10.Click on Finish button. 11.Enter coupon code as ABCD1234 and click apply. 12.Click on By Cash button. 13.Enter the amount received as greater or equal to total and click Ok. 14.Click on Done button.
Expected Result	<ol style="list-style-type: none"> 1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and customer details dialog box will come up. 4.Enter customer phone number and in case it's a new number the system asks for name. 5.Displays menu along with pizzas and special for the day. 6.The selected item will be displayed in the order. 7.New window with list of toppings comes up along with price. 8.Selected topping will be displayed along with price. 9.Return back to main menu. 10.New dialog box with payment options appears. 11.If coupon code is authenticated then discounted price will be shown. 12.New dialog box appears. 13.The amount of change is displayed. 14.Displays a Summary
Cleanup	Click on the X button at the top right of the window.

Test Case ID	TCPOS06
Title	Test for Logins
Module Tested	Login
Importance	This is the an important test as login is a primary function.
Instructions	1.Run the PizzaOrder.java class. 2.Click on Employee button. 3.Login using username and password as sandeep/varsha/harshil and password as pizza123.
Expected Result	1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and new Dialog box asking Customer details will appear.
Cleanup	Click on the X button at the top right of the window.

Test Case ID	TCPOS07
Title	Test for Logins
Module Tested	Login
Importance	This is the an important test as login is a primary function.
Instructions	1.Run the PizzaOrder.java class. 2.Click on Manager button. 3.Login using username and password as sandeep/varsha/harshil and password as pizza123.
Expected Result	1.The application starts. 2.Login dialog box will be displayed. 3.The username and password will be authenticated and new Dialog box will appear with menu options.
Cleanup	Click on the X button at the top right of the window.

4 Role of Developers

Role	Staff Member	Responsibilities
Project Developer	Varsha Chandrashekar	Responsible for overall UI design, implementation of logic for Order (place, modify, cancel), Add toppings, View Order status, Login logic, Order backup, Customer backup, Welcome screen.
Project Developer	Harshil Shah	Responsible for Manager User Interface, implementation of logic of Menu Item modification, deletion, addition , & setting special for today. Also responsible for integration of all work done by project developers & for documentation
Project Developer	Sandeep Kasavaraju	Responsible for UI of Payment and implementing classes related to payment & assistance with initial UI. Responsible for system test

5 Commit Logs

commit 63c0da637e420bf1d463c03a0cdc7c07d74de37a

Author: varsha0905 <varshaarun@Varshas-MacBook-Pro.local>

Date: Wed Oct 29 22:17:40 2014 -0600
